34	Zero knowledge cryptography & Ethereum	Human rights (privacy)	1. Vitalik Buterin, chief scientist, Ethereum Foundation, technical, Canada, male. Creator of Ethereum technology. 2. Zooko Wilcox-O’Hearn, founder and CEO, Z Cash, technical, US, male. Creator of zero knowledge proof. 3. Jacob Eberhardt, Technische Universitat Berlin & ZoKrates project, technical and academia, Berlin, male. Creator of ZoKrates project which is a framework for building privacy enhanced applications on top of Ethereum. 4. Vinay Gupta, founder, Mattereum, technical and policy, London, UK, male. Thought leader and a hell of a smart guy. 5. Andreas Antonopoulos, University College London, technical and academia, US, male. Powerful speaker, thought leader and blockchain advocate. 6. Patrick McCorry, Newcastle University, technical and academia, London, UK, male. He is able to give a practical example; his initiative deals with building an anonymous online voting system on the Ethereum platform. 7. Adrian Ford, president, Z Trust Foundation, technical, California, US, male. He is	Valentina	Pavel	ApTI - the Association for Technology and Internet	Civil society	Romania	Romania	female		Zero knowledge protocols opened a new privacy realm in the crypto space. Cryptoenthusiasts might already be familiar with ZCash, however, there are new opportunities for other types of applications to be developed - spreading far beyond financial transactions - that make use of these technologies to deliver unprecedented user privacy and auditability. We will soon be looking at a new category of decentralized blockchain-based apps that have the potential to bring full anonymity to a global scale, building on top of Ethereum’s recently added support for zero knowledge proofs. What kind of Dapps (decentralized applications) do we need? How do they help us? What are the challenges and opportunities?
